Sustainable Aluminum Pallets for the Beer/Beverage Industry

Take your sustainability initiatives to the next level by using reusable aluminum pallets in your beer/beverage operation.

The benefits of aluminum pallets for reusable transportation and packaging in the beer/beverage industry:

- Eliminate the need for stretch wrap using laydown keg pallets
- Reduce dependence on landfills by eliminating stretch wrap and wood from operation.
- Aluminum pallets are fully recyclable.
- Reusable aluminum pallets are lighter than wood pallets.
- Aluminum pallets have a high load capacity.
- Aluminum pallets are recyclable and easy to clean.
- Aluminum pallets eliminate the hazard of fire.
- Aluminum pallets have a great return on investment lasting 100 times longer than wood and 10 times longer than plastic.

The 1/6 aluminum laydown keg pallet is available in three different variations. These variations include palletization of 6, 8, and 10 kegs.

The 1/2 barrel laydown keg pallet only weighs 33 lbs.

The 32”x40” 4-way aluminum keg pallet is designed to palletize twelve 1/6 kegs or nine tall 1/4 kegs.

Aluminum Industries offer an endless variety of custom and standard pallets.
